

Bard Ventures Ltd. is a well managed Canadian exploration company focused on Molybdenum. Headed by a team of experienced professionals with proven records of success, the Company is poised to be the next major Molybdenum development story here in British Columbia. Given current Molybdenum market conditions, this appears to be the perfect way for management to maximize shareholders' value while continuing to make every venture a successful one.

Lone Pine Property

Project Highlights:

- An onsite BC Hydro Substation able to supply industrial strength power.
- Claims are adjacent to highway 16 which provides obvious transportation benefits through all phases of development
- Local work force and accommodations lower exploration costs dramatically
- Recent high-grade Molybdenum discovery in the Alaskite Zone (see table and images)
- Potential to discover a large tonnage high-grade deposit that would be attractive for either organic growth or potential sale.
- Gas pipeline onsite available for future use.
